Kadapa, AP, India | +91 7780727124 | chandandakka@gmail.com | github.com/chandan-1427 |
linkedin/in/chandan-dakka-805068360 | portfolio-1-two-lovat.vercel.app

Full stack developer with experience building multi-tenant SaaS backends, interactive frontend, AI-powered tools, and production infrastructure. Comfortable across the stack, from database design to deployment.

EXPERIENCE

Software Development Engineer

Mar 2025 – May 2025

GetBindu, AI Developer

Remote

- Built an end-to-end HR email automation system using Python, Agno, and AgentMail that processes job applications, extracts structured data, evaluates completeness, and generates professional responses.
- Built multiple minor agents and worked on frontend part of website.
- Served as Git maintainer, handled PR reviews and merges, wrote developer docs with Mintlify.

Application Developer Intern

Feb 2025 – Jun 2025

Skill India Program

Kothakota, AP

- Built and improved web application features using React and Node.js under a government digital skilling initiative.
- Designed REST APIs with structured validation and error handling to connect modular frontend components with relational databases.

Open Source Contributor

Feb 2026 – Present

GetBindu/Bindu, ag2

- Contributed multiple PRs to GetBindu/Bindu core repository, improving backend storage reliability and PostgreSQL performance.
- Contributed to ag2, and multiple AI repos with bindu add-ons during the intern period.

PROJECTS

Bindu Mail Agent | *Python, Agno, Claude Skills, Hindsight, PostgreSQL* | [GitHub](#)

Built at GetBindu

- Designed a modular AI agent system that processes job application emails, extracts candidate data, checks completeness against per-inbox rules, and sends auto-generated responses.
- Built with a skills architecture using Claude API and Agno, with full audit trails and PostgreSQL-backed storage for enterprise reliability.

Jyo — Food Sharing | *React, TypeScript, Hono, PostgreSQL, Drizzle ORM* | [GitHub](#) | [Live](#)

- Built and deployed a full-stack community food sharing platform for Tirupati connecting households with leftover food to nearby students — completely free with no delivery or payment.
- Implemented JWT authentication with HTTP-only cookies, bcrypt password hashing, email verification, and role-based access control using custom middleware in Hono.
- Designed a GPS-based feed with haversine distance filtering, privacy-preserving location reveal, and a state machine for post lifecycle management (open → pending → closed → completed → expired).
- Integrated Supabase PostgreSQL with Drizzle ORM, Supabase Storage for photo uploads, Resend for transactional email, and real-time in-app notifications via Supabase listeners.

Feedback Intelligence | *TypeScript, React, Hono, PostgreSQL, GROQ API* | [GitHub](#) | [Live](#)

- Built an AI platform that analyzes user feedback and returns summaries, sentiment scores, and key insights using the GROQ API.
- Designed a multi-tenant backend with Hono and PostgreSQL, with cookie-based JWT auth and CSRF protection.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React, Next.js, State Management, Tailwind CSS, Shadcn/ui

Backend: Node.js, Hono, Express.js, REST API Design, JWT Auth, RBAC

AI & Agents: LangChain, Agno, Claude, GROQ API, OpenAI Codex

Databases & ORM: PostgreSQL, MongoDB, MySQL, Drizzle ORM, Prisma ORM

Tools & DevOps: Docker, Git, Vercel, Render, Cloudflare, Postman, Jest, Mintlify

EDUCATION

B.Tech in Computer Science <i>SVCE, Tirupati, AP</i>	Graduated April 2026 <i>GPA: 8.6</i>
Diploma in Computer Science <i>Govt. Polytechnic, Kadapa, AP</i>	May 2023 <i>GPA: 8.0</i>
